

# LOAI HAMDY

## UNIVERSITY STUDENT

### Profile

I am a computer science senior student, am interested in cloud storage systems, operating systems, machine learning with two year exp in Python development.

### Contact

REHAB CITY  
New Cairo  
Cairo  
(011) 17002271  
loaihamdyaminmohamed@gmail.com

### Skills

**HTML/CSS** - Moderate  
**Photoshop** - Advanced  
**Wordpress/Genesis** - Moderate  
**PHP/MySQL** -

### Work Experience

Optimum location for billboard advertisements using(GPS trajectories) Graduation project 2018

Here is a brief description of what me and three of my faculty colleagues do, we created a system that can detect the optimal location to place billboard advertisement in the streets using GPS data and machine learning algorithms(DB-scan, sklearn).

E-commerce website(Web based) Web development project 2017

Here is a brief description of what I did, me and two of my university colleagues developed a system using(PHP-JSON-html-css-java script), detected to clothes shopping, also the system was linked to an inventory system, to make it more realistic and reliable

Bacman game simulation (machine learning) AI project 2016

We used brute force algorithms to solve the problem of bacman game

### Education

Computer Science 2014 - Present  
Misr international university

### Hobbies & interests

I love running, swimming, football(playing and watching) and reading.

Intermediate  
**Javascript** - advanced
