FADY KHALED

OBJECTIVE

An enthusiastic Graduate Computer Science Student where I can use my ability to develop problem-solving skills and advance my abilities in the Computer Science field.

EXPERIENCE

Internship in **Credit Agricole Bank** from Aug 2018 - Sep 2018 in IT Departement. I was exposed to a real-life environment of the project management cycle starting by stating the project standards up to delivering the product.

PROJECTS

Graduation Project
LOCO | Python, Django, Contiki
The first system to-date that works on improving the indoor placement of IoT devices in order to reduce the power consumed by the devices and extend their lifetime.

Education Center System
Software Engineering | PHP, JavaScript, HTML, CSS
A developed Educational website that includes an administration system, an e-mail system, design patterns, a well-developed database, a whole dynamic website, and a reliable source of information keeping, the system was presented to a real customer.

Student Portal System
Web Development | PHP, JavaScript, HTML, CSS
A developed website that includes all the facilities for managing all students authorizations (Courses - Schedule - Grade - Attendance - Transcript - Payment System - Administration, etc..).

Student Portal Mobile Application
Mobile Development | Android
The proposed application was taken into consideration to be used on the official Misr International University website due to fitting the strategic, and usability plans and requirements.

Inventory Management System
