

CELL TOWER PLACEMENT

JOY ABDELMASSEH, MARK NABIL, MARK SAMIR, NERMEEN HAGGEG

Supervisor: Dr. Mohammed El-Gazzar

Teacher Assistant: Eng. Haytham Metawie

Date: 15/10/2019

INTRODUCTION(1/1)

- Manually placement of cell tower is time consuming
- Phases of Placement a cell tower.
 1. Extract features from an image to get some analysis
 2. Build layers using GIS
 3. Automated decision by machine learning

RELATED WORK (1/3)

Using GIS for Measuring Mobile Tower Radiation on Human

- To place cell tower in correct place with consideration of surrounded building
- GIS , map up places which will accepted\not accepted zone
- Expected result: using ArcMAp
- 4 phases:
 1. Specify mobile towers
 2. Transfer data
 3. Analyze collected data
 4. result

RELATED WORK (3/3)

ANTENNA PLACEMENT OPTIMIZATION FOR CELLULAR NETWORKS

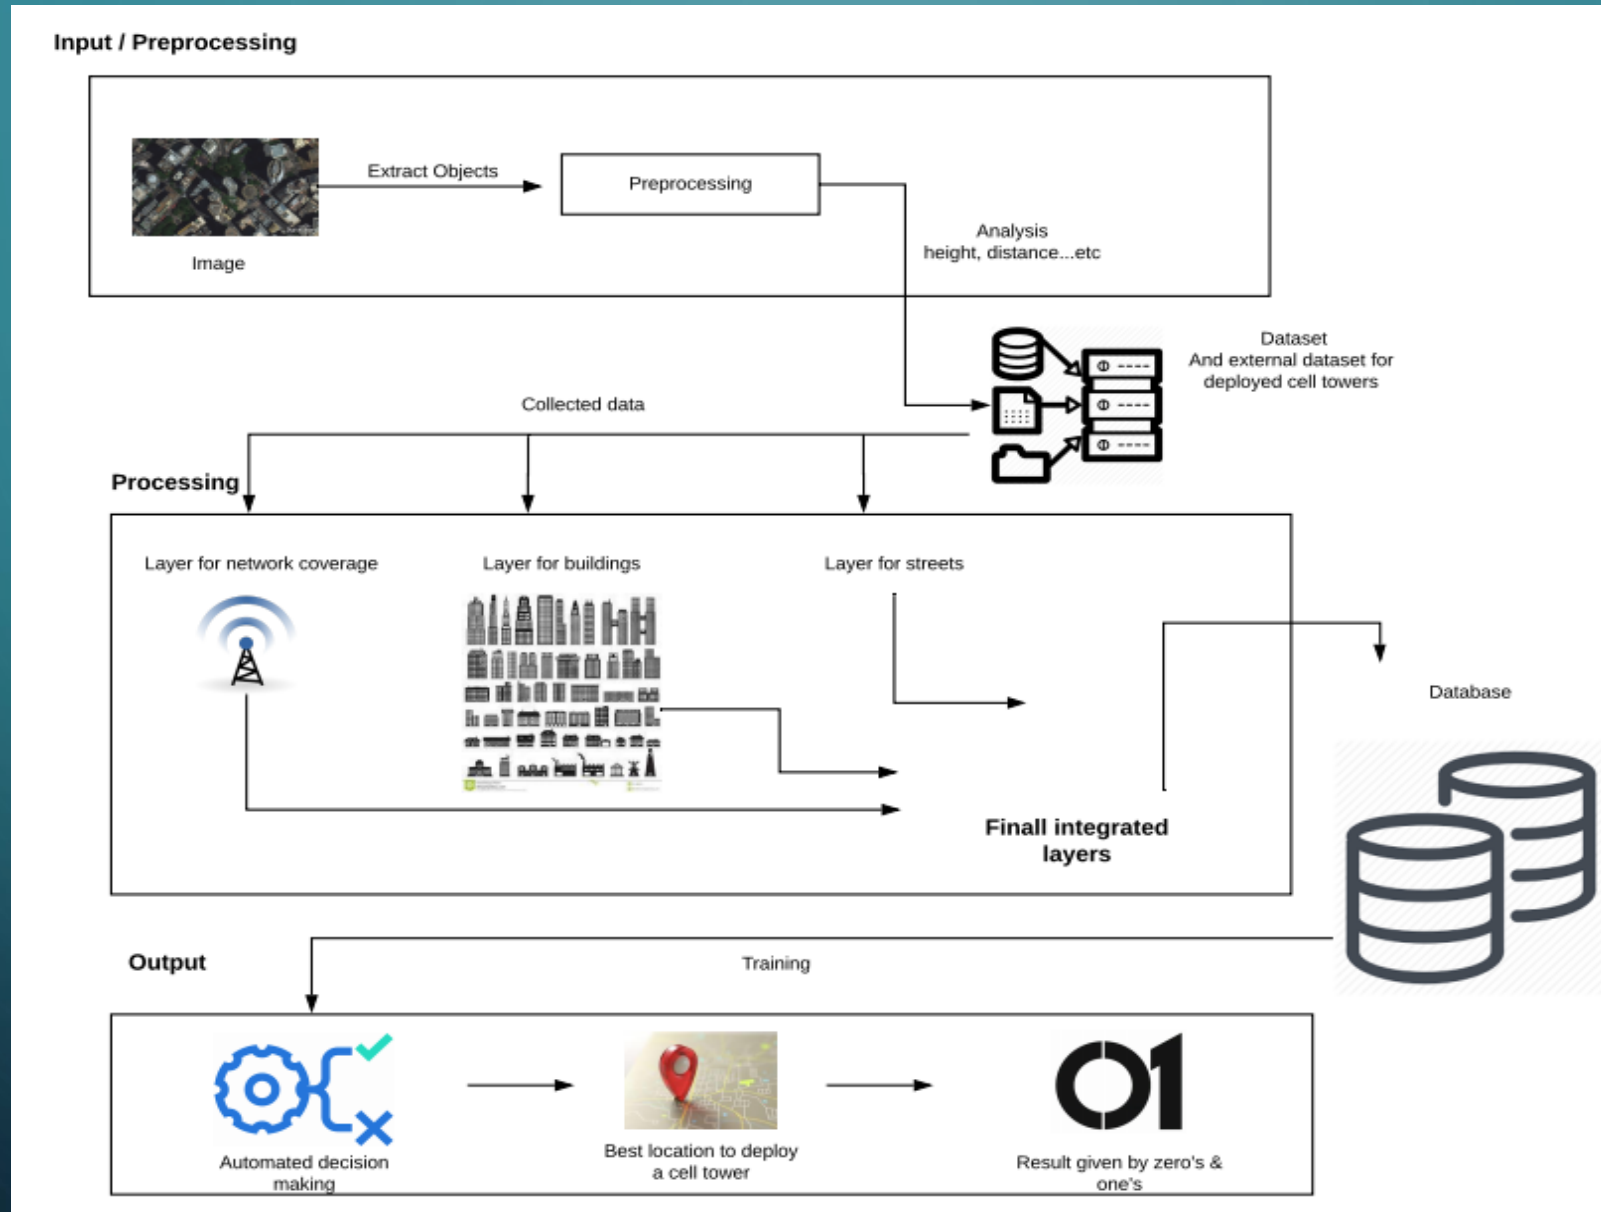

- ~~Aim to~~ decrease manually cell planning to be automated approaches
- Algorithm: Branch and bound
- Tech: optimal solution placement Through MATLAB simulations

PROBLEM STATEMENT

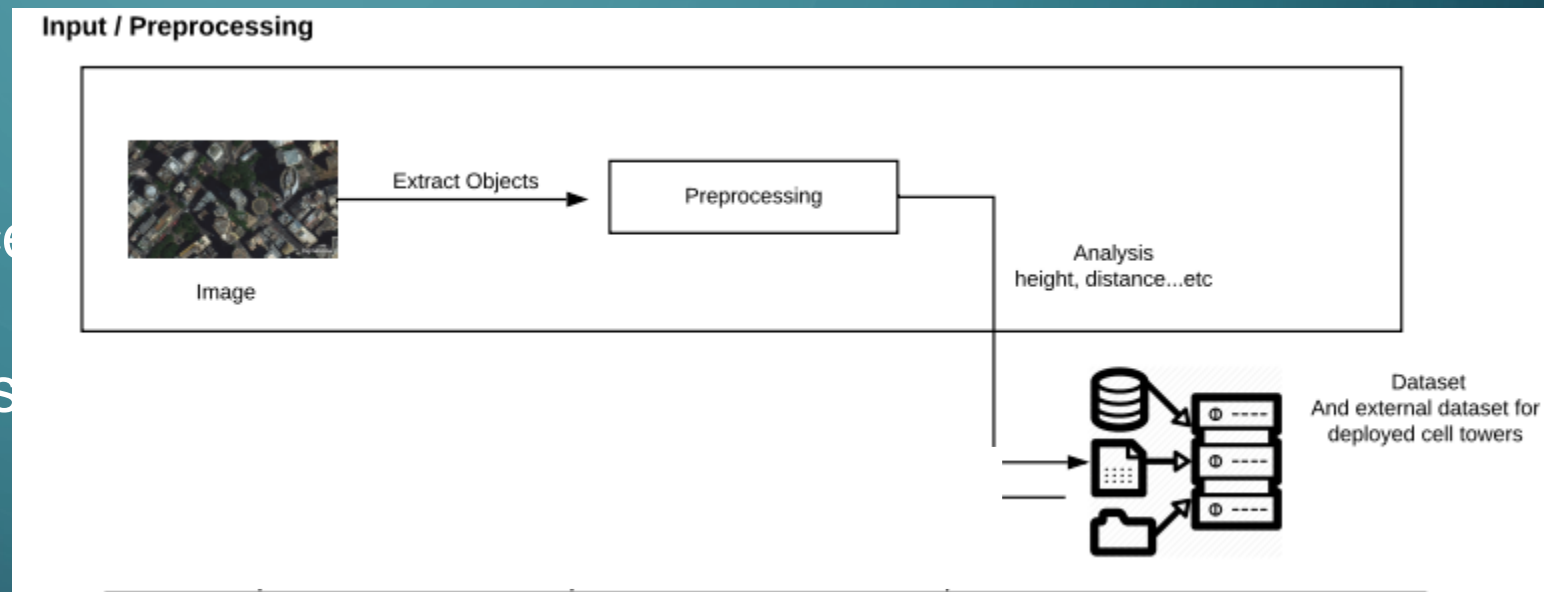

Finding the **accurate** place to fix over cell tower station costs mobile operators big chunks of money. Our **target** is to **provide automated cell tower allocator system**

SYSTEM OVERVIEW

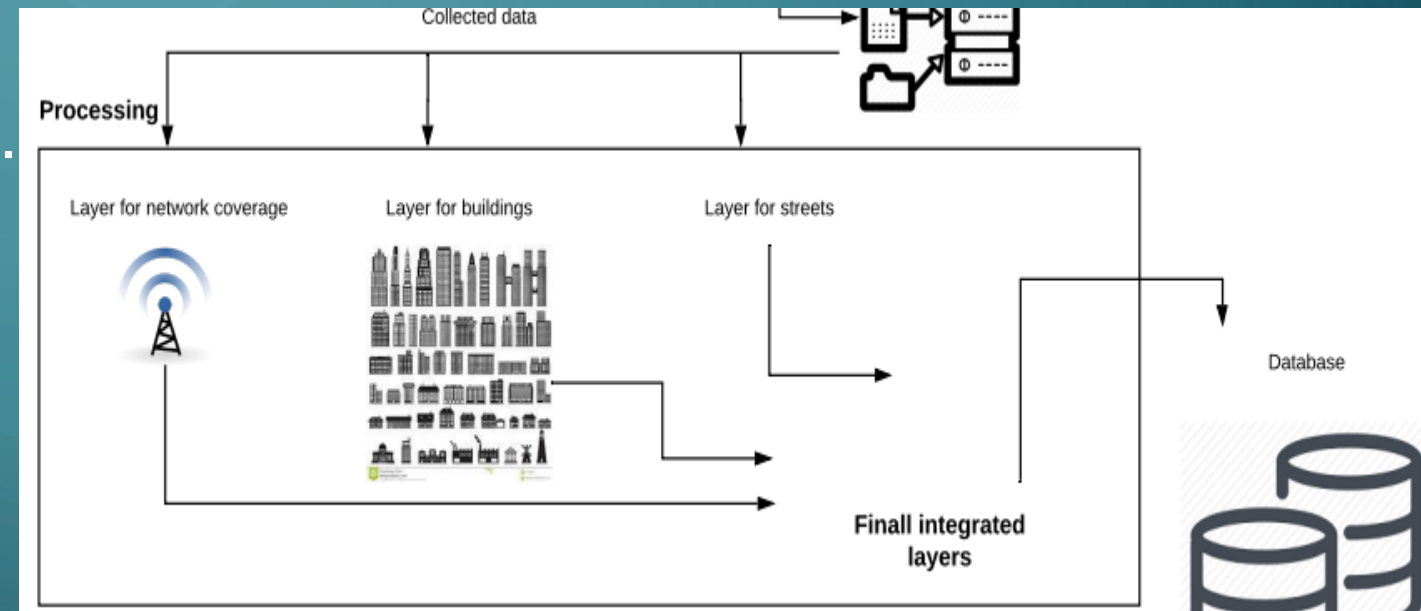

PREPROCESSING

- 1- Get an image.
- 2- Extract features from image.
- 3- Detect the height, the distance between the buildings and network coverage to build dataset

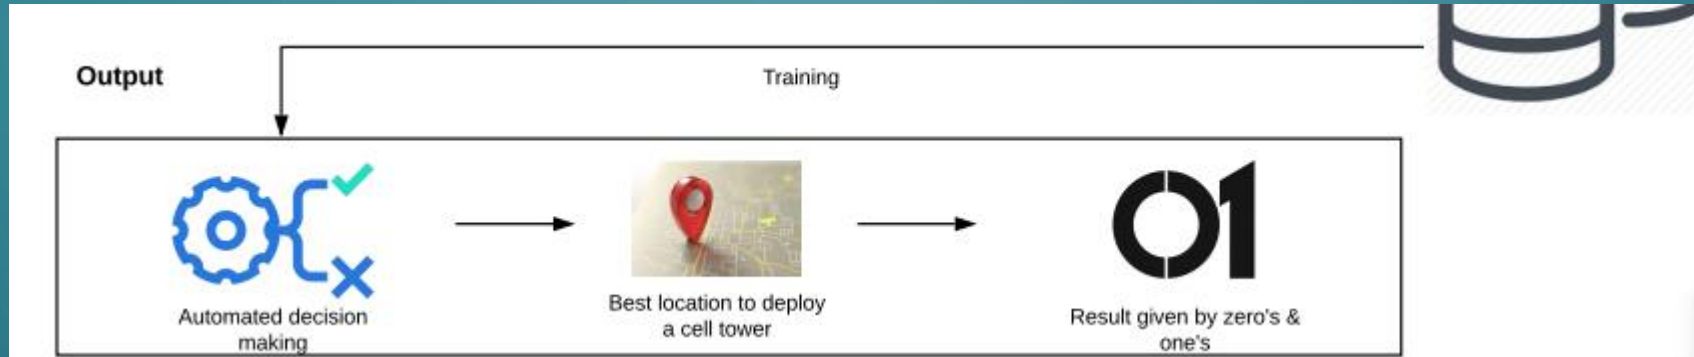

PROCESSING

- 1- Get the collected data from dataset.
- 2- Build layers.
 - a) Layer for network coverage
 - b) Layer for buildings
 - c) Layer for streets
- 3- Integrate the layers together.

OUTPUT

1. Locate the finest place to deploy an antenna.
2. Make an automatized decision
3. Giving the result in zero's and one's

EXPECTED RESULT

- By an automated decision get the most suitable place for deploying an antenna

Dear Abdullah , Mohammad ,

Hope this mail find you well, I am Mark Nabil Mehanni i am a student in Misr International University, Egypt. I am working on a group project concerning The cell tower management system I was hoping kindly if you can help me and send me the data set you used in your project concerning the [Using GIS for Measuring MobileTower Radiationon Human] .

Thanks in advance, really looking forward to hearing from you.

DEMO

The background is a dark teal color with a large, faint, light teal circle in the center. The corners of the slide are decorated with white, stylized circuit board traces and nodes. The top-left and bottom-left corners have more complex, branching circuit patterns, while the top-right and bottom-right corners have simpler, more linear traces.

ANY QUESTIONS?

Thank You
